

Test laboratory for the fire behavior of building materials, Dipl.-Ing. (FH) Andreas Hoch  
Testing, supervising and certifying body, authorized by the building supervision authority

## **TEST REPORT**

### **PZ-Hoch-200587-2**

**for the proof of Fire behaviour according to DIN 4102, part 1**

**Translation of the German test report – no guarantee for translation of technical terms**

|                                |  |
|--------------------------------|--|
| <b>company</b>                 | <b>Heytex Bramsche GmbH</b><br>Heywinkelstraße 1<br>D-49565 Bramsche   |
| <b>description of samples</b>  | polyester mesh fabric, coated with ethylene vinyl acetate (EVA)<br>colour: white   |
| <b>name of the material</b>    | „H7071 Ecotex mesh B1“   |
| <b>sampling</b>                | by the company itself  |
| <b>content of request</b>      | Proof of flammability to classify building materials to class B1<br>“schwerentflammbar” according to DIN 4102, part 1  |
| <b>validity of test report</b> | 30.06.2025   |
| <b>result</b>                  | <b>The examined product meets the requirements of class B1 for<br/>“schwerentflammbare” (hardly flammable) building materials<br/>according to DIN 4102, part 1 (May 1998), suspended freely or with<br/>distance of &gt;40 mm to same or other plain materials.</b> |

This test report includes 4 pages and 4 enclosures.

This test report replaces the test report PZ-Hoch-200587 from 30.06.2020.

Remark: If the above mentioned building material is not used as product according to MBO § 2, Abs. 9, Ziffer 1, there is no need for a general building supervisory test report.

This test report is not valid if the examined building material is used as product in the meaning of state building prescriptions (MBO § 17, Abs. 3).

This test report does not replace an eventually necessary proof of applicability concerning building supervisory or building laws in the meaning of state building prescriptions. This has to be verified by:

- “allgemeine bauaufsichtliche Zulassung” (general building inspectorate approval) or by
- „allgemeines bauaufsichtliches Prüfzeugnis“ (general building inspectorate certificate) or by
- “Zustimmung im Einzelfall” (exceptional approval)

This test report can underlie building supervisory procedures

- for regular building products for the prescribed proofs of conformity
- for non-regular building products for the needed proofs of applicability.

This test report must not be published and copied without preceding agreement of the test laboratory and if agreed, only during validity and unchanged concerning appearance and contents.

### **1. Description of test material in condition as delivered**

**PN 31507:** „H7071 Ecotex mesh B1“ colour: white  
polyester mesh fabric, coated with ethylene vinyl acetate (EVA)  
There is no difference between side A and side B.  
characteristic values determined by the test laboratory:  
area weight: about 185 g/m<sup>2</sup> thickness: about 0,32 mm

The testing laboratory is not provided with further details concerning composition of the tested building materials. Samples are deposited.

## 2. Preparation of samples

The samples were kept in climate chamber 23/50 until they reached constant weight.

**3. Arrangement of samples**      mounting: freely suspended

#3656: flaming side A in weft direction  
#3657: flaming side B in weft direction  
#3658: flaming side B in warp direction

**4. Date of test** CW 27 in 2020

**5. Results** The test has been examined according to DIN 4102 (Mai 1998)

| line no. | Measurement  | Result with the tested specimen |          |          |     | Dim.  |

According to DIN 4102, part 1, "schwerentflammbare" (hardly flammable) building materials must meet the requirements of class B2.

Pursuant to additional tests in the ignitability apparatus this can be determined (appendix 4).

## 8. Special remarks

- This report is only valid for the material as described under paragraph 1. In combination with other materials or with additional coatings or grounds etc. the burning behaviour may differ.
- This test report is not valid for the exposure to outdoor climate conditions.
- This test report is not valid, as soon as the fabric is used as a building product in the sense of the "Landesbauordnungen" (state building requirements, MBO § 17, par. 3).
- This test report is no substitute for a General Building Inspectorate Certificate.
- This test report is granted without prejudice to the rights of third parties, in particular private proprietary rights.
- For legal interests only the German original version is relevant.
- In General Building Inspectorates procedures this test report can be based for
  - regular building materials for the required proof of accordance
  - for not regular building materials for the required proof of applicability

## 9. Validity

This test report is valid until the mentioned date on page 1. The test report becomes invalid in case the standards on which the tests are based are changed.

Fladungen, 02.07.2020

clerk in charge:

(Dipl.-Ing. (FH) Jürgen Hammer)

Head of the test laboratory:

(Dipl.-Ing. (FH) Andreas Hoch)

**„Brandschacht“-test #3656**

**measurement**

**„Brandschacht“-test #3658**

**measurement**

**#3658, PN31507: HEYTEX, "H7071 Ecotex mesh B1", B+K**

Max. flue temperature: 110°C, Smoke density integral: 9%/min

Residual length: 64 cm

**Test for normal flammability  
classifying B2 according to DIN 4102**

1. Description of test material in condition as delivered look at page 2

2. Preparation of samples

Out of the material there have been cut samples for the ignitability apparatus.  
The samples were kept in a climate 23/50 until they reached constant weight.

3. Arrangement of samples -freely suspended-

Flaming in warp and weft direction / Flaming side A and side B

4. Date of test CW 27 in 2020

5. Results

<sup>1)</sup> time mentioned from the beginning of the test <sup>2)</sup> during 20 Sec -/- no appearance -- no information

6. Remarks and explanations to the testing procedure - none -

7. Opinion concerning the dropping of burning material

The test for normal flammability shows no burning dripping material.
