

ORAJET® 3967AC Aircraft Graphic Film

New graphics film by ORAFOL reaches for the sky – Endless new and creative possibilities for aircraft decorations

The new aircraft deco solution introduced by ORAFOL includes the digital printing vinyl **ORAJET® 3967AC Aircraft Graphic Film** matched up with the special lamination film **ORAGUARD® 293AC**. Both films come with a perforated structure, to enable an easy and bubble-free installation of large sized decals on the aircraft. Being a PVC based film, ORAJET® 3967AC Aircraft Graphic Film comes with very good printing properties as well being very conformable in application. With the lamination film ORAGUARD® 293AC retention of the gloss is ensured in a far more effective way than with a clear coating, and formation of cracks in the surface is prevented.

ORAJET® 3967AC Aircraft Graphic Film with ORAGUARD® 293AC - the ideal solution for branding and promotion for display at the gate as well as in the air.

Product benefits include:

- Perforated cast PVC film
- Glossy surface
- For short term outdoor graphic applications on the exterior of aircrafts
- Inkjet printing with solvent based inks or UV inks

Recommended Laminating Films:

- ORAGUARD® 293AC

Engineered to Perform Better™
